News Release

Easy Way to Report Potholes

(March 13, 2013) With temperatures warming, we are now seeing the results of snow, rain and long periods of freezing temperatures on our streets. The expansion of moisture in cracks in the road can result in potholes.

The Street Division has been hard at work filling potholes as they find them. With 360 miles of roads, it isn't easy to find them all as they appear. Nampa residents are encouraged to report potholes through our new and improved website. Online forms can be found by clicking on *Report A Concern* or by going to *How Do I?* then clicking on *Report A Problem*. The form titled Pothole can be found under Streets.

An online form can also be found through those two links under Streets allowing the public to report street lights that are out. The form is titled Street Light Outages.
