City of Nampa Requirements:

Stabilization:

Temporary stabilization of the construction site shall be completed to the surface of all disturbed areas within 10 days of clearing or inactivity in construction. When in-channel work is conducted, the channel shall be stabilized before, during and after work. Swales or other areas that transport concentrated flow will be stabilized with erosion control matting or sod.

Expiration of Permit:

Every permit issued shall become invalid unless the work on the site authorized by such permit is commenced within one hundred eighty (180) days after its issuance, or if the work authorized on the site by such permit is suspended or abandoned for a period of one hundred eighty (180) days after the work is commenced.

EPA Requirement:

“I certify under penalty of law that I understand the terms and conditions of the National Pollutant Discharge Elimination System (NPDES) General Permit for Stormwater Discharges From Construction Activities that authorizes the stormwater discharges associated with industrial activity from the construction site identified as part of this certification. Further, by my signature, I understand that I am fully responsible, along with all other contractors and subcontractors signing such certifications who are performing work activities under this contract to comply with all provisions and requirements of the NPDES General Permit for Stormwater Discharges from Construction Activities and this Stormwater Pollution Prevention Plan.”
